PROFESSIONAL SUMMARY

BIM Manager and Structural BIM specialist with 12+ years of experience delivering major projects across KSA, UAE, Kuwait and Egypt in the water treatment and lagoon, hospitality, residential, commercial and institutional sectors. Implements BIM to ISO 19650 — BIM Execution Plans, model segregation and federation strategy, naming conventions, clash matrices and model auditing — and administers the Common Data Environment on Autodesk Construction Cloud as Hub Admin. Leads full project engineering teams across all disciplines — structural, architectural, mechanical, electrical and infrastructure — producing high-precision LOD 400/500 models and shop drawings in Revit and Civil 3D, with IFC/COBie interoperability between authoring platforms. Recognised for technical leadership, quality assurance and for bridging design intent with site execution across all project phases.

CAREER HIGHLIGHTS

- Led 18 structural BIM engineers across six concurrent projects in KSA, UAE and Kuwait, delivering approximately 15,000 LOD 400/500 shop drawing sheets at a 95% first-time approval rate — including the King Salman University package, some 6,000 sheets issued in six months.
- Authored the project BIM Models Segregation Strategy and restructured the model register around logical construction zones, cutting federation and clash-detection overhead while meeting the consultant's coordination requirement.
- Expanded the project BIM standard to cover coordinate management, worksets, clash detection, model health, version control, QA, archiving and recovery — aligning delivery with ISO 19650.
- Autodesk Construction Cloud Hub Admin — CDE structure, permissions and the WIP / Shared / Published workflow across the project team.

PROFESSIONAL EXPERIENCE

BIM Manager | Perfect Engineering & Constructions — Cairo, Egypt

Aug 2026 – Present

Key Projects: *Mountain View iCity — Crystal Lagoons (New Cairo, Egypt)*

Key Responsibilities & Achievements:

- Lead the full project engineering team across every discipline — structural, architectural, mechanical, electrical and infrastructure — reviewing all shop drawings before submission and running the coordination between them.
- Own BIM delivery for the project: BIM Execution Plan and appendices, model segregation strategy, clash matrix, naming convention and the multi-phase model register.
- Reorganised every discipline into one federated model plus up to four zone-based models, agreed with the supervision consultant, cutting federated coordination and clash-detection time per cycle.
- Set the naming convention, shared levels and grids, coordinate management, model ownership, review and approval route and model health checks for the whole delivery.
- Administer the Common Data Environment on Autodesk Construction Cloud as Hub Admin — folder structure, permissions, WIP / Shared / Published workflow and issue tracking.
- Model the subsurface gravity drainage network (pipes, manholes and surfaces) in Civil 3D and export via IFC and NWC into Revit and Navisworks with exact coordinate preservation.
- Issue and control the project RFI register with the design consultant and PM, consolidating multi-discipline queries into single structured submissions.
- Produce the periodic BIM Model Progress Report against the client's reporting format, rolling up completion across the full model register.

Senior Team Leader – Structural BIM Engineer | Smart Engineering Consultancy — Cairo, Egypt

Jun 2024 – Jul 2026

Key Projects: *Diriyah South District – Raffles Hotel & Branded Residences (Diriyah, KSA) • King Salman University – KSU (Diriyah, KSA) • King Abdulaziz City Park – Green Riyadh (Riyadh, KSA) • Almana New Riyadh Hospital (North Riyadh, KSA) • STEP Sewerage Network Odour Control (Abu Dhabi & Al Ain, UAE) • Souk & Hotel (Sabah Al-Ahmad City, Kuwait)*

Key Responsibilities & Achievements:

- Led a team of 18 structural BIM engineers producing LOD 400/500 shop drawings in Revit Structure across the six projects above, all running concurrently.
- Delivered the King Salman University package to programme — approximately 6,000 shop drawing sheets issued in six months, a sustained rate of a thousand sheets a month.
- Ran full structural, architectural and MEP coordination in Navisworks, driving federated models to a clash-free state ahead of every submission milestone.
- Reviewed and approved all structural drawings prior to submission, sustaining a 95% first-time approval rate across roughly 15,000 issued sheets.
- Represented the structural team in technical and coordination meetings with clients and consultants across four countries.

Senior Technical Office Engineer | Aqar Masr Developments — Cairo, Egypt

Jul 2021 – May 2024

Key Projects: *Anakaji Compound — New Administrative Capital, Egypt*

Key Responsibilities & Achievements:

- Structural engineer within the owner's internal technical office, accountable for the full structural shop drawing package and supervising a production team working in Revit, AutoCAD and ASD.
- Reviewed and analysed structural design packages to catch discrepancies and missing data before they reached site.
- Led coordination with the architectural and MEP disciplines to ensure integration across all drawings.
- Resolved technical issues with consultants, secured drawing approvals and issued approved packages to the sister contracting companies for execution.

Senior Technical Office Engineer | Giza Power Transmission & Distribution — Egypt

Dec 2019 – Jun 2021

Key Projects: *Hayah Karima Projects (Qena & Sohag) • New Administrative Capital Infrastructure • Hosh Essa • San El Hagar*

Key Responsibilities & Achievements:

- Managed a team of junior technical office engineers responsible for drawing production and submittals.
- Prepared and reviewed shop drawings and drawing logs for consultant approval, and raised RFIs covering all technical issues.
- Produced quantity take-offs, cost estimation and material, labour and equipment breakdowns, and prepared sub-contractor bills of quantities.
- Coordinated between consultants, contractors, owners and utility authorities, aligned architectural drawings with structural and MEP packages, and represented the technical office in progress meetings.

Site Technical Office Engineer | Solid Constructions — Egypt

Jul 2017 – Nov 2019

Key Projects: *Seashell Hotel • Seashell Units • Andrea Resort*

Key Responsibilities & Achievements:

- Produced and controlled structural workshop drawings and bar bending schedules, maintaining the shop drawing log through consultant approval.
- Acted as the coordination link between the site technical office and head office to facilitate architectural and MEP drawing submissions.
- Carried out quantity surveying for executed work, supplier invoicing and RFIs for missing, unclear or conflicting design information.

Site Technical Office Engineer | Al Shafar General Contracting – ASGC — Cairo, Egypt

Jul 2016 – Jun 2017

Key Projects: *Cairo Festival City Living*

Key Responsibilities & Achievements:

- Prepared and revised structural shop drawings and reinforcement schedules against project specifications.
- Coordinated with site teams and engineering departments to ensure drawing accuracy and buildability.
- Followed up material requirements, site progress and consultant approvals.

CORE SKILLS

BIM Management & Standards

ISO 19650 Implementation • BIM Execution Plan (BEP) • Common Data Environment (CDE) • Model Segregation & Federation Strategy • Naming Conventions & Model Register • Clash Detection & Clash Matrix • Model Auditing & Model Health • Version & Revision Control • LOD / LOI 400–500 • IFC & COBie Interoperability • Worksets & Cloud Worksharing

Software

Revit Structure • Revit Architecture • Civil 3D (networks & surfaces) • Navisworks Manage • Autodesk Construction Cloud / BIM 360 (Hub Admin) • Dynamo for Revit • AutoCAD 2D • ASD • SOFiStiK • Primavera P6

Technical Office & Commercial

Shop Drawing Production • RFI Management • Quantity Surveying • Cost Estimation • Material Tracking • Purchase Orders • Quality Control • Document Management

Leadership & Communication

Technical Team Supervision • Interdisciplinary Coordination • Client & Consultant Interface • Report Writing & Documentation • Conflict Resolution

CERTIFICATIONS & TRAINING

- Autodesk Certified Professional — Revit Structure (Advanced)
- Autodesk Certified Professional — Revit Architecture (Advanced)
- Autodesk Certified Professional — Quantity Surveying in Revit
- Autodesk Certified Professional — BIM Coordination

EDUCATION & LANGUAGES

Bachelor's Degree in Civil Engineering | Higher Technological Institute **2009 – 2014**

Activities: Member of the Student Union, Higher Technological Institute.

Languages: **Arabic** — Native **English** — Professional Working Proficiency
